

NCR Account Services

Looking to take your customer service to new levels?

YES

Providing more reliable, convenient and faster service

By effectively automating a range of routine transactions, such as statement printing, account enquiries, standing order maintenance and providing loan quotes, NCR Account Services frees up your tellers to concentrate on value-added activities, such as sales and service. With online capability and secure customer authentication, fast-track product applications can also be completed at this service point, providing another revenue opportunity for your self-service channel.

- **Improving customer satisfaction**

Your customers can perform a range of tasks themselves – quickly, easily and whenever it suits them rather than waiting in a teller line. With its intuitive ATM-like screens and access to Internet banking, the NCR Account Services terminal is also easy to use and designed to be available to your customers 24 x 7.

- **Reducing costs**

By automatically suppressing mailed statements to anyone obtaining a printed statement from the terminal, it can cut processing and postage costs.

- **Going green**

With Dual Sided Thermal Printing you can print statements or marketing messages on both sides of the paper, reducing consumption of natural resources while capitalizing on new merchandising space.

- **Greater opportunities**

Combining NCR Account Services with NCR APTRA™ Promote and Relate software enables you to deliver dynamic and personalized marketing messages while the customer is pre-staging their transaction.

- **Built for the branch**

NCR Account Services has a modular design in a compact footprint, for lobby or vestibule configurations offering Internet banking, bill payment, check deposit and account and product information, printed up to A4 size.

For more information, visit www.ncr.com,
or email financial@ncr.com.
