

NCR FASTLANE SELSERV™ CHECKOUT FAMILY

NCR's FastLane SelfServ™ Checkout family offers solutions to fit any retail environment. Your shoppers will enjoy the convenience, speed, and simplicity while you find new ways to optimize your store operations and deliver enhanced customer service.

For more information visit ncr.com or contact us at financial@ncr.com

NCR FastLane SelfServ™ Checkout Release 5 and 6

NCR FastLane SelfServ Checkout offers a more flexible and efficient way to scan, bag, and pay for items. Offering no bag, one, two, or three-bag configurations, NCR helps you meet your operational needs while conserving valuable front end space. Both Release 5 and 6 also feature optional input belts which gives shoppers more space to unload items at checkout.

Release 6 offers cash management advancements such as bunch note recycling, with support for up to eight coin denominations and increased note and coin capacity. It also features updated styling with a new color scheme and a smaller footprint.

NCR FastLane SelfServ™ Checkout Convertible Solutions

What if you could switch from self-service mode to a cashier-assisted lane during peak periods to help increase throughput? With the Release 6 convertible option, a cashier can easily convert the lane simply by turning a handle and rotating the scanner and point-of-sale module to be cashier facing. There's no confusion for shoppers as they always remain on the same side of checkout, no matter if it's in self-service or cashier-assisted mode.

- All convertible solutions convert to a fully assisted cashier lane in less than a minute
- Full size convertible lanes can include input belts for larger basket sizes
- NCR FastLane SelfServ Release 6 with the convertible feature rotates the entire display and scanner platform 180 degrees.
- FastLane software quickly switches into cashier mode

NCR FastLane SelfServ Release 5 Express Convertible

NCR SelfServ™ 90

A sleek, compact, self-checkout designed for the shopper who has five items or less to purchase. This self-checkout is a true 'grab and go' concept and supports credit and debit transactions. The SelfServ 90 can be mounted on a pedestal, wall, or on a countertop offering retailers flexibility and saving valuable floor space. An optional security scale is available for environments requiring weight-based security.

NCR FastLane Software

Using a multi-pathing strategy, NCR FastLane software provides shoppers with several different options to navigate through a transaction. The user-interface also provides instructional animations for shoppers new to self-checkout to see and hear how to use the technology. In the latest software release, shoppers can now navigate through the transaction using gestures similar to their smartphone.

The NCR Remote Attendant Program (RAP) gives attendants a way to monitor transactions with ease. NCR offers both fixed and mobile RAP solutions, giving attendants increased flexibility when assisting shoppers during their checkout.

Better service with self-service

By implementing self-checkout in your stores, you are not only providing your shoppers with more options, but also improving your store operations at the same time. Cashiers who had been dedicated to one assisted service lane are now able to monitor and support several self-checkout lanes and provide better customer service. Time spent in queues is dramatically reduced with more lanes open and available during store hours. Your shoppers benefit from a fast, easy, and convenient checkout experience.

Give your shoppers what they have come to expect with the NCR FastLane SelfServ™ Checkout Family.
