Are you doing everything you can to secure your ATM network?

Every year, criminals steal millions from ATMs globally. It's always you and your customers who lose out. When transactions cannot be made in a safe and secure environment your customers lose trust in your self and assisted service network and you experience tangible losses as well as indirect costs to your brand and shareholder value.

Most ATM attacks fall into six major categories. They are card skimming, cash trapping, card trapping, explosive attacks, RAM raids and logical attacks. NCR analysis of the situation has shown that attacks types can range in losses from several hundred dollars – for cash trapping attacks, to hundreds of thousands of dollars from logical attacks and RAM raids. They each vary both in frequency and the potential loss per attack.

However, all of this adds up, with the potential losses reaching significant levels.

card skimming, cash trapping, card trapping,
explosive attacks, RAM raids, logical attacks

The impacts of these attacks could have been prevented or minimized by the addition of NCR security solutions. Potential risks of **\$1,000 per ATM per year** could have been mitigated with solution investments that cost far less.

Potential losses of
\$1,000
per ATM per year
due to these type of attacks

Take control of your ATM network

We are changing the game when it comes to ATM security. NCR feels that security must be an essential part of your ATM deployment strategy and not an option. NCR's approach to security directly aligns to our customer's key strategies around growing revenue, unlocking an amazing customer experience and lowering costs.

NCR Secure provides a comprehensive portfolio of solutions that are aligned to protect against the key modes of security attacks. Through the deployment of multi-layered security solutions, the direct benefits for you include the offset of direct losses, enhanced customer confidence and avoiding compliance fines, penalties and liabilities.

NCR Secure Feature Package

So, what's included in the package?

NCR Skimming Protection Solution

Protect your ATM network from the risk and associated costs of skimming protection attacks. Global losses from these types of attack exceed \$2 billion annually. Don't become a statistic. Let NCR Skimming Protection Solution (SPS) help reduce the risk of attack while making sure your ATMs are always available to your customers when they need them.

Solidcore Suite for APTRA™ license

Prevent the execution of unauthorized code on your ATM systems. Protecting the code at runtime and maintaining the integrity and compliance of the ATM means you can reduce the risk and costs related to ATM protection. No unauthorized code will run. Eliminating the ability for malicious programs or persons to compromise your ATM network.

Cash Trap Inhibitor

Provides a physical barrier to the cash dispenser to prevent insertions of cash traps used to capture cash.

Strengthened Top Box Lock

Adds security to the top box of the ATM with an upgraded UL 437 lock.

NCR is here to help to you with all your security needs

In addition to the solutions and services in the Secure Feature Package, the NCR Secure portfolio contains many specialized solutions. These are either designed against a more specific form of attack, or are specific to a particular region focussed on local market requirements.
