

# I AM NCR POWER ENTERPRISE

Wholesale Distribution

## Controlling the flow of goods through the supply chain can be a daunting task for any business.

Especially companies faced with the challenges of managing fast-moving consumer goods, as the inability to control enterprise-wide item flow efficiently and cost-effectively can literally mean the difference between success and failure.

An advanced suite of supply chain management and logistics software solutions, NCR Power Enterprise provides distributors, retailers and manufacturers with a range of applications to optimize and manage the flow of goods through complex supply chain networks. From suppliers, to distribution centers, to your customers, NCR Power Enterprise gives you the speed, agility and information you need to deliver any number of goods to any location.

On time. Accurately. Day after day.

- Innovative software and services designed to integrate complex supply chain networks
- Extensive supply chain portfolio that manages financials, operations, CRM, SRM and business intelligence
- Ability to automate routine tasks, eliminate paper and improve communication
- Comprehensive traceability and recall solutions
- Serving more than 800 distribution centers worldwide
- Leveraging 30 years of supply chain leadership and expertise

## Financials

NCR Power Enterprise integrates critical business transactions across multiple systems, including those typically managed manually in spreadsheets. It eliminates time-consuming processes, optimizes efficiencies and provides extensive operational reporting and views. Processes are streamlined. Inventory and stock levels are optimized. Associates are empowered. Administrative and overhead costs are reduced.

Fully integrated financials include general ledger, accounts receivable, accounts payable, payroll, commissions, budgeting and more. Since the modules are designed specifically to integrate with the entire application, all financial modules work seamlessly with your key operating functions.

## Operations

At the core of Power Enterprise are the Operations Modules. Distribution, processing, order management and billing, and other critical processes are also managed centrally and more effectively than ever before. Inventory management optimizes order levels and reduces inventory and out-of-stocks, while increasing inventory turns and cash flow.

Warehouse management and logistics solutions are offered either individually or as part of the complete Power Enterprise suite. Our warehouse management software reduces errors in receiving, picking and packing, shipping and returns.

Logistics solutions include route transportation optimization, dock scheduling yard management, and proof-of-delivery systems. Route optimization manages inbound and outbound planning, reducing expenses while maximizing usage and potential savings. The dock and yard systems allow control of the entire dock and yard by providing centralized scheduling and visible tools to sync with distribution and warehouse schedules. Proof-of-delivery optimizes the last mile of the supply chain by eliminating paperwork and improving delivery reconciliation.

## Supplier Relationship Management (SRM)

Key to NCR Power Enterprise are the modules for automating and optimizing processes between suppliers, central office employees, store personnel, customers and others who are critical to your organization's success. Robust purchasing, forecasting, e-commerce and vendor modules use real-time data to help improve communications and order processing, eliminate paper and optimize inventory management.

## Customer Relationship Management (CRM)

Order entry can be handled in-house, via laptops and mobile devices and by customers via the internet, making receiving and handling orders convenient and at any time of the day.

Mobile solutions enable sales executives to enter orders remotely and access key customer information, expediting order entry and improving accuracy significantly. Deliveries can be automated and time saved for the entire company by electronically capturing signatures, accepting payments, processing returns on location and more.

# Why NCR?

NCR Corporation (NYSE: NCR) is the global leader in consumer transaction technologies, turning everyday interactions with businesses into exceptional experiences. With its software, hardware, and portfolio of services, NCR enables more than 485 million transactions daily across retail, financial, travel, hospitality, telecom and technology, and small business. NCR solutions run the everyday transactions that make your life easier.

NCR is headquartered in Duluth, Georgia with approximately 29,000 employees and does business in 180 countries. NCR is a trademark of NCR Corporation in the United States and other countries.

## Business Intelligence

Understanding productivity metrics and making changes to correct anomalies are essential for achieving sustainable profitability and growth.

Power Enterprise offers a wide array of business intelligence tools that make even the most complex business dynamics easier to analyze and understand.

Profit and loss, reporting, sales and product analysis and productivity dashboards can be created, monitored and analyzed, giving management a high-level view of critical KPIs.

## Software-As-A-Service (SaaS)

NCR (SaaS) and cloud-based services provide companies with enhanced flexibility in implementing NCR solutions, and enable quicker time to market, a large choice of deployment options and minimal upfront costs and effort. The SaaS option significantly reduces Total Cost of Ownership (TCO) by decreasing license, maintenance and infrastructure costs and offering various "pay-as-you-go" options.

NCR Dock Scheduling has been developed to take advantage of the needs of dealing with multiple customers and carriers to provide one location for scheduling and confirming deliveries. With hundreds of thousands of appointments made each month through our online portal, the solution has proven to be both easy to use and cost effective.

## Industry-Leading Services

Our extensive set of services is tightly linked to NCR software products, providing customers with tangible advantages in time-to-market, cost of ownership, quality and service-level agreements. Coupled with our global deployment ability, the NCR product-led services empower our customers with a higher level of flexibility and choice.

The range of services complement our software offerings with industry expertise, best practices and methodologies needed to balance IT investments and optimize business and technology processes. SI Services include business consulting, program management, customer acceptance testing, automated testing, deployment, training and documentation, and customer support. NCR SI Services are offered with flexible models, from shared delivery, through turnkey projects to managed services.

NCR delivery services include a full set of service offerings that provide customers with high quality solutions, and enable timely adaptation and implementation of NCR products. We ensure smooth operation from the initial project phase through successful deployment, in accordance with customer-specific requirements and business processes. Services range from solution design, through development of product customizations and interfaces, to configuration and localization, as well as management of upgrades and post-deployment support.

NCR continually improves products as new technologies and components become available. NCR, therefore, reserves the right to change specifications without prior notice.

All features, functions and operations described herein may not be marketed by NCR in all parts of the world. Consult your NCR representative or NCR office for the latest information.
