

NCR POWER PRODUCTIVITY

Retail and Distribution Industries

Are you getting the most out of your warehouse labor force? Industry benchmarks suggest you're not – but we have the tools to help.

In the average distribution center and warehouse, employees only work five hours of productive time for every eight hours they're paid. That statistic is staggering for any profit-conscious manager, especially in tough economic times. But it doesn't have to be a reality for anyone.

NCR Power Productivity confronts and reverses that troubling trend by deploying industry-standard and user-defined labor standards throughout a facility or an entire organization. It also provides you with the centralized tools, analysis and reporting needed to monitor and evaluate employees—and reward the most productive.

The result is elimination of labor inefficiencies, a motivated labor force and an average increase in warehouse productivity of more than 35 percent.

- Improves overall warehouse and company efficiency
- Cuts cost of distribution and warehouse labor
- Creates a level playing field on which to measure labor standards
- Enhances discipline among management and employees
- Eliminates unaccountable time spent on the clock

Why NCR?

NCR Corporation (NYSE: NCR) is the global leader in consumer transaction technologies, turning everyday interactions with businesses into exceptional experiences. With its software, hardware, and portfolio of services, NCR enables more than 485 million transactions daily across retail, financial, travel, hospitality, telecom and technology, and small business. NCR solutions run the everyday transactions that make your life easier.

NCR is headquartered in Duluth, Georgia with approximately 29,000 employees and does business in 180 countries. NCR is a trademark of NCR Corporation in the United States and other countries.

Ensuring time worked equals time paid

NCR Power Productivity deploys Electronic Labor Standards (ELS) to level the playing field for all warehouse employees. With the solution, every job at any section of the facility has a predefined travel time and expected time frame to perform the task.

Power Productivity provides comprehensive reporting functions so managers can efficiently evaluate warehouse operations and employees. Managers can then monitor labor activity in real-time, drilling down to measure finite details at the task or employee level, and compare actual performance against the set standards. This way, managers have instant visibility into inefficient processes or individual labor concerns.

Power Productivity can also help develop or enhance employee incentive programs that boost motivation and morale. The system even predicts the future by using the set standards to forecast upcoming workloads, and to plan weekly and daily schedules - all of which improves overall workflow and productivity.

So put the power in your hands and learn more about NCR Power Productivity today.

Product highlights

- Defined labor standards
- Comprehensive performance reporting
- Configurable by selection zone
- Individual performance details in real time
- Full audit trail for detailed analysis
- Standardizes operating procedures
- Drill-down capabilities into each work assignment
- Accurately calculates warehouse travel times
- Travel times based on user defined parameters
- Workflow scheduling
