

# I AM NCR DE-INSTALLATION SERVICES

De-installation/Decommission/Disposal

## Protect yourself—and the environment

Count on our experienced team of service delivery experts to de-install and dispose of your retired IT assets the right way, keeping old data secure, freeing up storage space, and keeping you in compliance with environmental regulations. NCR's De-installation Service is a seamless solution for managing end-of-life electronics effectively, without hassles or unnecessary costs.

### Effective asset elimination

Temporary elimination of old equipment just delays the inevitable, adding unnecessary effort and expense to the process. Trust our team of certified service technicians to de-install, decommission, and dispose of your retired IT assets for you, saving you time, money, and headaches.

### Data security

All data on all of your retired IT assets will be secured and destroyed, protecting your customer's security.

### Free up resources

A significant number of retired assets go unnoticed and accumulate in storage closets and warehouses. Our de-installation and disposal services will free up valuable space so you're better organized and can make room for new IT resources.

# Why NCR?

NCR Corporation (NYSE: NCR) is the global leader in consumer transaction technologies, turning everyday interactions with businesses into exceptional experiences. With its software, hardware, and portfolio of services, NCR enables more than 550 million transactions daily across retail, financial, travel, hospitality, telecom and technology, and small business. NCR solutions run the everyday transactions that make your life easier.

NCR is headquartered in Duluth, Georgia with over 30,000 employees and does business in 180 countries. NCR is a trademark of NCR Corporation in the United States and other countries. The company encourages investors to visit its web site which is updated regularly with financial and other important information about NCR.

## Environmental compliance

Rest easy knowing that we will dispose, replot, recycle, or warehouse your old equipment in compliance with all federal, state, and local legislation and in an environmentally sound manner, eliminating any liability. We'll even make sure you receive tax credits for qualifying donations, so you get the most out of your equipment investment.

## Seamless deployments

De-installation, Decommission and Disposal Services are just one phase of the deployment services we offer. From design validation, site surveys, and staging to equipment procurement, installation, and staff training, we can expertly manage and coordinate the entire process, ensuring your next project deploys smoothly and successfully.

## Key features

### • De-installation done right

We will power down old equipment, pack it in appropriate packaging, and remove it from the premises. It will then be relocated to a site within a local radius of the customer's premises. We can even replot, recycle, or get rid of the equipment as part of our disposal service.

### • Secure decommissioning

Depending on your needs, we will remove any existing configuration from the equipment being decommissioned, as well as any affixed asset tags or labels. We will then pack your retired equipment into client provided boxes for shipment to your designated final destination.

### • Proper disposal

As part of our disposal process, we will crush, shred, or otherwise permanently disable your equipment to prevent it from being returned to service. We will also remove any affixed asset tags or labels and provide you with a Certificate of Destruction, acknowledging that the equipment has been destroyed.

### • Equipment refurbishing

We can refurbish your old equipment for reuse. Whether you plan to warehouse assets temporarily then reinstall them in a new environment, or just want spare parts for your existing equipment, we'll make sure everything is in working order.

### • Changes happen

We're ready for you, no matter where technology takes you. Whether you need to move, add, or change solutions around, NCR can help you act fast, so you always stay a step ahead.

NCR continually improves products as new technologies and components become available. NCR, therefore, reserves the right to change specifications without prior notice.

All features, functions and operations described herein may not be marketed by NCR in all parts of the world. Consult your NCR representative or NCR office for the latest information.
