

Increase ATM availability. Enhance customer experience. Boost revenue.

NCR Power Advantage power conditioners increase the availability of any ATM by cleaning and stabilizing facility power to the ATM.

Availability

↑30 hrs
per ATM annually

Work Orders

↓15%

Chronic Failures

↓65%
of ATMs stopped showing
chronic behavior

In North America, a national financial institution tested the effects of power conditioners on a portion of their fleet resulting in increased ATM availability*. With this increase, they expect additional revenue of \$1M over a 5-year period.

*142 ATMs including various model types, tiers and locations.

Power Conditioning Units are not Uninterrupted Power Supplies, instead they solve a different problem and are essential to your overall power strategy.
