

I AM NCR POWER+ MOBILE STORE

Retail Industries

The power to manage store operations at the shelf edge and back room from the palm of your hand

NCR Power+ Mobile Store helps store associates complete the tasks required to run a retail store, informed by timely information delivered on modern devices. An intuitive interface lets them access their assigned workflows through configurable user profiles so that tag printing, price verification, receiving, and returns can all be accessed through a single system. Plus, department managers can generate purchase orders or warehouse orders by scanning items as they walk the aisles. All of these functions are enabled via wireless networks so that data is captured at the point of activity, and communicated across the enterprise in real time.

NCR Power+ Mobile Store is part of our integrated mobile merchandising platform, providing a single user experience and mobile access to Power DAX, Power Inventory and Power HQ. The functionality is easy to learn, which minimizes training expense, improves user adoption and reduces the risk of costly mistakes. Since all of these solutions are fully integrated, there is no risk of data synchronization issues; store associates and corporate office staff have access to the exact same data in real time.

Why NCR?

NCR Corporation (NYSE: NCR) is the global leader in consumer transaction technologies, turning everyday interactions with businesses into exceptional experiences. With its software, hardware, and portfolio of services, NCR enables more than 550 million transactions daily across retail, financial, travel, hospitality, telecom and technology, and small business. NCR solutions run the everyday transactions that make your life easier.

NCR is headquartered in Duluth, Georgia with over 30,000 employees and does business in 180 countries. NCR is a trademark of NCR Corporation in the United States and other countries. The company encourages investors to visit its web site which is updated regularly with financial and other important information about NCR.

Store deliveries, returns, and transfers - simplified

NCR Power+ Mobile Store allows store inventory to be managed accurately. As items are received, the system verifies the quantities and effective item costs on the delivery date versus the vendor data. This increases receiving efficiency and simplifies invoice reconciliation at both the store and corporate office. The solution supports direct store delivery (DSD) receipts, and receiving against open purchase orders or validation against EDI standard data. A streamlined method of receiving for trusted vendors means there is no need to receive line by line – only randomly selected items.

Store inventory controls with a corporate view

Having proper inventory discipline is essential to running a profitable store. NCR Power+ Mobile Store includes cycle count, smart count and free count functionality, so that on hand balances are accurate. NCR Power+ Mobile Store also supports cross-department and store-to-store transfers so that every movement is tracked, whether an item is to be used as a supply, consumed in another department, or sent to another location. Power+ Mobile Store helps store associates execute and monitor all inventory transactions, which allow store managers and corporate merchandisers to make better business decisions, and reduce risk of shrink.

Related Products

- Power HQ
- Power DAX and Power Inventory

Product Benefits

- Mobile store operations management with easy-to-use screen navigation and access to relevant information
- Ensures accurate and profitable execution of store processes
- Streamlines price validation, vendor deliveries and store transfers, ensuring inventory accuracy
