

CASH MANAGEMENT AS A SOFTWARE SERVICE (SaaS)

MANAGE YOUR CASH OPERATIONS FROM THE CLOUDS—
EMPOWERING YOU TO TRULY FOCUS ON CASH MANAGEMENT
RATHER THAN THE TECHNOLOGY NEEDED TO SUPPORT THE SOLUTION.

ENJOY ALL THE BENEFITS OF NCR'S CASH MANAGEMENT SOLUTION PORTFOLIO WITHOUT THE INFORMATION TECHNOLOGY (IT) UPKEEP.

Software as a Service (SaaS) based solutions are gaining attention these days because this software deployment option provides business focus to your cash operations without the necessity of **any** technology investment. On-going costs to ensure software compliance can also be avoided as NCR provides the necessary secure physical infrastructure, ensuring that all regulatory requirements and policies are followed for the hosted solution.

Proven cash management

Delivering NCR OptiSuite® in a SaaS model has proven successful for many customers around the world, regardless of financial assets or estate size. Through this deployment model, a customer truly controls the outcome of their cash distribution activities and can leverage the solution's forecasting and optimization rich capabilities to alert when the self-service network of ATMs, Advanced Devices (recyclers, etc.), Branches, Cash Centers, as well as vaults are triggering cash alerts. Similar events can potentially transpire at the Branch, Cash Centre, or even at the Vault level but are easily managed by OptiSuite. Tangible savings are easily demonstrated through the abundance of managerial cost optimization reports.

Stay focused on your customer

- Configure your system the way you know best;
- Manage it in a timely manner;
- Eliminate the burden of managing Information Technology updates;
- Do not let technology impede your business;
- Empower your staff to own the business and not the technology;
- Take back control of your business priorities.

Optimized cash supply chain management

NCR Cash Management deployed in a SaaS model or as a license bears absolutely **no** functional difference. Should you choose to address cash activity through the entire supply chain, including all ATMs, deposit and recyclers, branches, armored car carriers, cash centers and/or central vaults, OptiSuite provides further benefit through a modular implementation approach.

Process optimization and automation are achieved through workflow oriented designs, cash inflow and outflow tracing, advanced risk management reporting, “what-if” simulations and easy-to-use exception analysis tools.

KEY BENEFITS OF SaaS DEPLOYMENT

- No IT infrastructure changes required
- No surprise or additional IT spend to maintain infrastructure
- No more waiting for IT upgrades to benefit from solution enhancements
- Lower cost of ownership compared to traditional license
- Rapid Deployment

COUPLED WITH THE SOLUTION BENEFITS

- **Cost Management:** Tracks carrier and supply costs and interest rate effects to reduce operational costs
- **Seasonal Variation:** Accounts for holidays and local events when making recommendations
- **Alerting:** Pre-emptive alerts to avoid cash outages when actual usage moves out of step with predictions
- **Emergency Tracking:** Issues and tracks emergency orders if cash shortages occur
- **Simulation:** Performance measurements and “what-if” simulation for contingency planning
- **Reporting:** Track the effectiveness of your cash operations
