

NCR SelfServ™ XK32 INTERACTIVE KIOSK

FOR EXCEPTIONAL SERVICE AND IMPROVED REVENUES,
THINK *INSIDE* THE BOX

Today's connected consumers have higher expectations than ever before. They want seamless and enjoyable experiences, and they want to choose how they research, shop, and fulfill their purchases. While the retail industry is witnessing the undeniable rise of digital channels, the physical stores remain at the heart of the shopping experience. Retailers are rethinking brick-and-mortar to offer more personalized experiences, provide a higher level of service and to be more flexible by incorporating digital experiences into the physical store.

Personalized experiences to help increase sales

Engaging consumers at the point-of-decision is the ideal time to offer cross-sell and up-sell opportunities. The NCR SelfServ XK32 interactive kiosk is the perfect way to present shoppers with product recommendations and related accessories that help increase revenues and profits. Easier integration with retail loyalty programs allows you to design personalized recommendations and provide your shoppers with accrued rewards points for their purchases. All this, and the visually-engaging form factor, means the NCR SelfServ XK32 will help catch your consumers' eyes, and help create quicker adoption and higher usage rates.

Endless aisle creates endless opportunities

The NCR SelfServ XK32, can help with a seemingly-elementary but critical aspect of the shopping experience - having the products available for purchase that your shoppers demand. Providing shoppers with the option to order items that aren't carried in a particular store, or to order an out-of-stock item helps prevent dissatisfied customers from shopping elsewhere or walking out empty-handed. That's a missed opportunity you cannot afford. Our kiosks make it easy for consumers to order an item and choose to pick it up at a later date, or have it shipped to their home. Not only does your store save the sale, but you provide your shoppers with the convenience and flexibility they desire.

Knowledgeable service

Today's digitally-enabled consumers often research items online before making a purchase, and sometimes can become more knowledgeable than the store associates, which leads to frustration and dissatisfaction. The NCR SelfServ XK32 interactive kiosk is the ideal way to provide detailed product information to shoppers, and to augment your associates' knowledge base and help make them instant experts to deliver superior service to all consumers.

Flexibility for a perfect fit

The XK32 is versatile with multiple peripheral choices and mounting options to best fit your business needs and the design of your physical space. Deploy it on a wall to conserve space or set it up as a two-sided standalone to take full advantage of its footprint. An all-in-one device, the XK32 supports receipt printers and 2D imagers as well as Verifone and Ingenico payment devices with magnetic stripe readers or full-on EMV with chip and PIN.
