

I AM NCR RETAIL WIRELESS LAN DEPLOYMENT SERVICES

Enable a smarter shopping experience with in-store wireless connectivity

Keeping you and the customers you serve connected, informed and empowered

The explosive growth of wireless devices has created a ubiquitously connected consumer who is more informed than ever when making buying decisions. Consumers are using mobile devices to assist in making in-store purchasing decisions in researching product information and soliciting social interaction from their connected communities during the process. Today's retailer requires the capability to predict and respond dynamically to evolving customer needs.

Transform your in-store shopping experience with in-store wireless network connectivity (Wi-Fi). Enable more personalized and proactive customer interactions and more informed and empowered employees ready to serve customers wherever they are in the store. NCR Wireless LAN Deployment Services are designed and optimized for your Retail environment.

A global partner with proven methods for success

NCR's global reach and a proven wireless methodology provides a unique and well-defined wireless network deployment process with predictable outcomes that can be scaled globally to meet your enterprise needs supporting the latest IEEE 802.11 WLAN versions.

Why NCR?

NCR Corporation (NYSE: NCR) is the global leader in consumer transaction technologies, turning everyday interactions with businesses into exceptional experiences. With its software, hardware, and portfolio of services, NCR enables more than 485 million transactions daily across retail, financial, travel, hospitality, telecom and technology, and small business. NCR solutions run the everyday transactions that make your life easier.

NCR is headquartered in Duluth, Georgia with approximately 29,000 employees and does business in 180 countries. NCR is a trademark of NCR Corporation in the United States and other countries.

Integrating Wireless LAN technology requires retail technology deployment expertise

Whether you are deploying a new WLAN infrastructure or upgrading an existing network there is more to consider than simply installing or replacing access points. It is essential to have an experienced deployment partner familiar with Retail environments with proven capabilities to assess, advise and integrate new technology into your unique environment yielding the performance you require.

NCR provides 130 years of retail technology expertise, a global infrastructure for scalability and the management expertise required to manage the deployment of your wireless network across your enterprise.

Key Features

NCR provides a single source to manage your Retail WLAN deployment throughout your estate. We leverage a proven deployment process to deploy WLAN technology. Once a thorough site assessment is conducted detailed architecture plans are developed and approved.

Your installation process will then begin based upon your desired schedule, conducted by experienced technicians who know the retail environment and will work to ensure your new technology is fully integrated into your stores.

- **Wireless LAN Infrastructure Assessment:** Assessment of current network and cabling infrastructure to assess readiness for new wireless network solution, identifying technology requirements, any risks and gap closure recommendations.

Yesterday's Wi-Fi may not meet today's needs

Enterprises are increasingly performing mission critical activities over wireless connections which require wire-like speed but with the benefit of mobile flexibility. As your business needs change, your wireless coverage should change to meet new density and throughput demands. Newer generations such as the second generation 802.11ac tout higher performance than previous generations with nearly 20 times the bandwidth compared to the 802.11n, which can be critical in meeting the vast demands of mobile and cloud applications, big data and social technologies. Partner with NCR for your WLAN deployment needs and reap the benefits of the deploying the latest most advanced technology for in-store wireless connectivity.

- **Wireless LAN Planning:** Predictive Analysis leveraging state-of-the-art surveying tools to understand the building's architectural characteristics to design the best configuration and placement for optimal performance and reliability.
- **Wireless LAN Design:** Detailed business and technical requirements are used to design the wireless architecture. As-Built documentation provided detailing the wireless parameters and coverage expectations.
- **Wireless LAN Procurement:** Procurement of WLAN equipment can be provided.
- **Wireless LAN Integration:** Providing the team and expertise to deploy your wireless LAN network.

NCR continually improves products as new technologies and components become available. NCR, therefore, reserves the right to change specifications without prior notice.

All features, functions and operations described herein may not be marketed by NCR in all parts of the world. Consult your NCR representative or NCR office for the latest information.
