

I AM THE NCR FASTLANE SELFSERV™ CHECKOUT

NCR FastLane SelfServ™ Checkout is an efficient way to improve operations and enhance the shopping experience

NCR FastLane SelfServ Checkout allows customers to scan, bag and pay for items on their own, while an associate monitors from a station nearby to help ensure a positive experience. The new generation solution features a refined, stylized design with store and lane reconfiguration capability.

Improve the shopping experience

NCR FastLane SelfServ Checkout speeds up the checkout process by making more checkouts available. Shorter lines, privacy, greater control and more choice make consumers happier and loyal to your brand.

Maximize your resources

NCR FastLane SelfServ Checkout allows you to meet customers' needs throughout the store by redeploying employees to other areas. Associates are freed up to answer in-aisle questions, maintain inventory and assist customers.

Seamlessly integrate with your existing systems

The NCR FastLane SelfServ Checkout open architecture integrates with existing POS applications and peripherals using a customized Transaction Broker software layer to create a "virtual cashier" for each self-checkout lane.

Ensure accuracy and protect against shrink

A number of psychological and physical theft deterrents are included in the NCR FastLane SelfServ Checkout, including an integrated security scale, a sophisticated self-learning and adjusting weight database, intervention lights and sounds, and attendant-monitoring tools.
