

# GLOBAL ATM CASH WITHDRAWALS

Why the ATM is still a vital self-service banking channel for consumers...

**Equivalent of 17% of world's GDP (\$77 trillion) is withdrawn in cash from ATMs each year!**

Consumer expectations of financial institutions have never been higher. Cash in circulation is increasing and continues to be the primary source for around 85% of global payments. This is accelerating consumer's demand for fast, secure and convenient access to cash.

**\$13.2 trillion dollars**  
was withdrawn from ATMs globally in 2015
