But Is The Concern Of High Availability A Barrier to Innovation?

The truth is many organisations, by refusing to consider alternative options, create a fragmented Frankenstein network of systems that's not cost-effective, sustainable or adaptable to future market demands.

The Cost of Maintaining Old Legacy Systems Like HP NonStop

80%

of bank budgets spent maintaining legacy systems

\$10MM+

Estimated renewal costs for legacy systems

Nearly 80% of bank operations leaders say their organization's existence could be threatened if they don't update technology to be more flexible and capable of supporting rapid innovation.

Migrating to modern architected applications using commodity platforms could cut your IT costs by up to 75% while still achieving your high availability demands

To learn how deploying high availability on standard hardware can help you compete more cost-effectively and adapt to future demands, visit:
