

NCR NETWORK AND SECURITY SERVICES

ADDRESS RISKS PROACTIVELY WITHOUT IMPACTING DAY TO DAY BUSINESS

NCR Network and Security Services (NSS) strengthen IT infrastructure with a multi-layered defense solution to help businesses secure their networks, detect security risks and threats, and prevent security compromises, all while enabling web activity reporting. The tools we implement and oversee at our customers' locations help protect the Point-of Sale (POS) network and systems connected to it. The security capabilities woven into NCR Network and Security Services help fend off Internet attacks and malicious software threats to minimize distractions due to data breaches and compliance violations. Our industry expertise and proven innovative technology offer numerous tangible benefits.

Improve the customer experience and strengthen your business

Successful businesses are employing increasingly sophisticated solutions to interact with customers, process payments, maintain inventory, and report on mission critical operational issues in real-time. NCR Network and Security Services managed networking

equipment and system oversight provides powerful IT infrastructure, so you can take advantage of the latest technologies to support your business objectives.

Engage customers with secure Wi-Fi capabilities

Consumers often choose where to do business based on the availability of Wi-Fi connectivity. NCR Network and Security Services empower you to offer your customers Wi-Fi that minimizes abuse and ensures your mission-critical applications aren't negatively impacted. Offering guests Wi-Fi enables you to leverage in store, real-time marketing through branded pages about your business and capture valuable feedback through customer surveys.

Secure reputation and customer data with PCI compliance

Internet attackers can attack IT infrastructure of organizations large and small, threatening your business reputation and exposing you to unexpected fines. NCR Network and Security Services security controls help protect against data breaches while helping you address many PCI compliance requirements.

Enhance employee productivity and reduce diversions

NCR Network and Security Services helps you keep your staff productive by giving you the power to automatically control websites that staff can visit. Restricting access to improper, dangerous, or otherwise undesirable websites helps protect your business against legal risks, Internet attacks and malicious software.

Web activity reporting delivered on demand

PDF versions of reports and charts showing activity can be delivered to operators by request. Reports include tracking the top visited sites, number of hits to sites, and activities within categories.

Lower your IT operational costs

NCR Network and Security Services integrates several security measures to safeguard your systems from unintended changes due to malicious software, other Internet threats or employee error, which help increase the rate of incidents that disrupt business operations and reduce the cost of unexpected support.

Ease deployment and improve reliability with tight NCR integration

NCR Network and Security Services is designed to integrate across NCR products and services, providing you with reliable operations including POS terminals, mobile and wireless solutions, customer outreach services and more.
