With complete hole-in-the-wall compatibility with equivalent exterior ATMs, the SelfServ 25 is the perfect fit when replacing your older through-the-wall ATMs. The SelfServ 25 offers cash withdrawal to your customers as well as a broad range of other services like bill payment, funds transfer, mobile phone top-up, couponing and vouchers. It’s the ideal ATM to deliver your brand to the broadest possible audience in the broadest possible range of locations.

**Proactively fixes itself**
Keep your ATMs up and running, offering your customers the transactions they want, when and where they need them. NCR’s express recovery and self-healing technologies reduce downtime from hours to minutes—making your ATMs available around the clock.

**Keeps you informed**
Successful network management is about having the right information at your fingertips. NCR SelfServ ATMs provide data in real-time on configurations, software versions and the activity levels of each module. So you can see, understand and control your entire network—and make more empowered decisions.

**Inspire trust in your ATM network**
The SelfServ 25 is designed to defend against known and unknown fraud attacks, even before they start. Ask us about our multi-layered approach to ATM security including logical and physical solutions. For example, Solidcore Suite for APTRA protects against the execution of unauthorized code on your ATM network and our Skimming Protection Solution protects cardholder data from card skimming attacks.
