

SD-WAN

Empowering the Digital Future

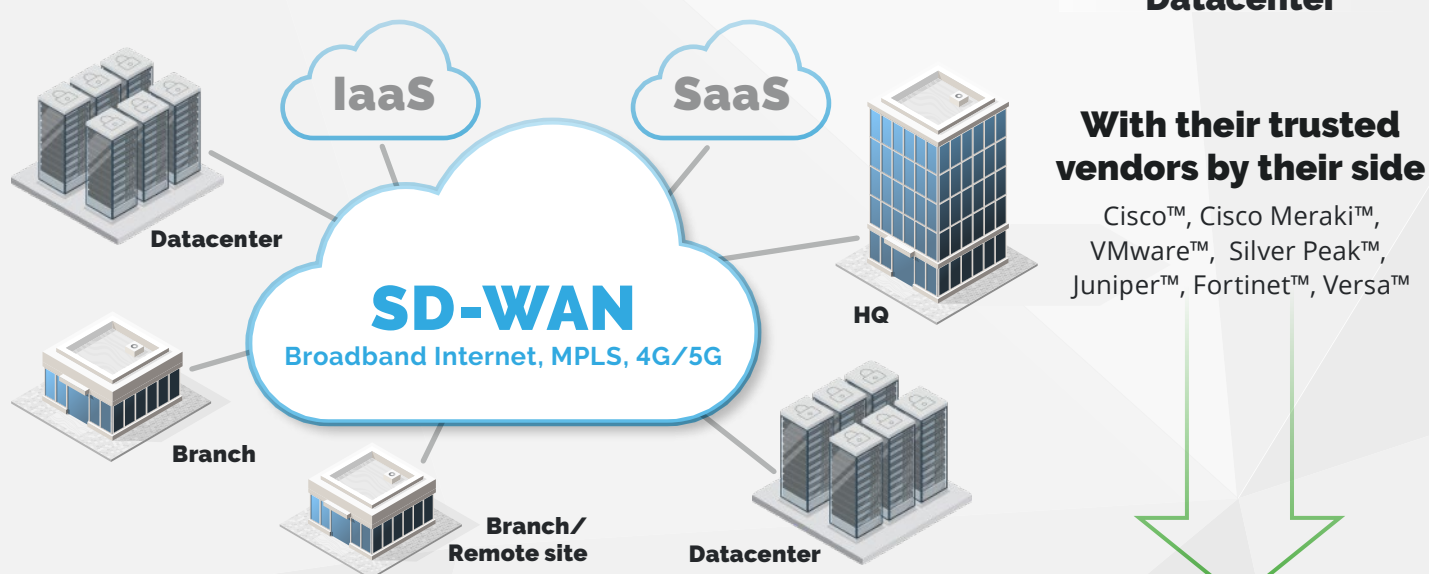

Digital transformation is putting enormous pressure on networks.

Traditional WAN networks are becoming too complex and expensive to manage.

To stay competitive enterprises must adapt.

With their trusted vendors by their side

NCR Value: Quality. Speed. Consistency.

Communications Service Providers (CSPs) are enabling enterprises' digital transformation by helping them to migrate from MPLS to fully managed SD-WAN solutions.

CSPs will rely on trusted service partners to help them deploy and support SD-WAN solutions that are more agile, flexible, cost effective and also faster to deploy.

When choosing a service partner, the following key differentiators should be considered:

- ✓ The breadth and depth of services offered including technical skills and coverage to deploy SD-WAN solutions
- ✓ Vendor agnostic services partner who plays well with multiple SD-WAN vendors to give you the most flexibility
- ✓ Operational efficiency and global serviceability – a one-stop-shop with continuous and consistent global operations for design, deployment, management, and monitoring
- ✓ Ongoing technology innovations and investments

NCR Proven Experience

A global CSP needed a partner with proven networking solution expertise to help deploy and support SD-WAN implementations for end customers worldwide.

By partnering with NCR, the CSP received next generation SD-WAN service solutions from design, deployment, maintenance, remote monitoring and management, hardware procurement and logistics. Our highly skilled and certified services experts have designed and built networks all over the world, with a proven and globally consistent approach to advanced deployment support of SD-WAN solutions.

Let NCR be your global trusted partner for SD-WAN solutions.
